"Fine Clothes"

The matrimonial bombshell that set all New York talking as a stage play

CLARESHOLM LOCAL NEWS

Tony McKinley left the first of the week for Pincher Creek where he will organize an Elks Lodge.

The Clareholm Boy Scouts raised \$25 for the Wood's Orphan Homes at Oids, which was sent this week.

Mrs. Etherington, Howard, Fred and Miss Evelyn, left on Thursday for St. Catharines, Ont., their former home.

A Christmas concert and dance will be held at the Meadow Creek school on the evening of December 22nd, at 8 o'clock.

Nick Tantanger was again one of the prize winners in sled grain at the Chicago show, in the hard red spring wheat class.

Mr. Hayfield, of the School of Agriculture, has accepted a position as scoutmaster of the Clareholm troop of Boy Scouts.

A service on behalf of the Clareholm Bible Society will be held at the Starline school on Sunday afternoon at 3 o'clock.

There is still time to have that photograph for Christmas made at the Clareholm Photo Studio. Make your appointment today.

Don't miss seeing the big Hoot Gibson picture, "The Calgary Stampede," at the Rex theater on Friday and Saturday nights this week.

Commissioner Marsh of Calgary was in town on the evening of the 16th, and visited the Boy Scouts and Girl Guides at a meeting in the Parish Hall.

Church of the Nazarene, Christmas program, Greenbank school, December 20, 2:30 p.m. Clareholm church, December 24, 7:15 p.m. Welcome all.

"Fine Clothes," from Franz Molnar's sensational stage play "Fashions for Men," will be the attraction at the Rex theater next Monday and Tuesday nights.

Don't forget E. Ramsdell's sale on Monday, December 21, seven miles east and one mile north of Clareholm. A lot of real good stuff will be sold. S. L. Fraser, auctioneer.

The Clareholm Boy Scouts and Girl Guides wish to thank the parents and children who so kindly assisted in making up the box of toys for the Sunshine Christmas work at Calgary.

John F. Miller, eye sight specialist, of 404 Underwood Block, Calgary, will be at Queen's Hotel in Clareholm on Tuesday, Dec. 22nd. Tell your neighbors he is better equipped than ever.

There will be no service at St. John's Church of England on Christmas day, but services will be held on Sunday, 27th December, at 11 a.m. and 7:30 p.m., to be conducted by the Rev. H. Montgomery, formerly of Banff.

The annual meeting of the Star Line Local U. F. A. will be held on Monday, December 21, at Star Line school house, at 8 p.m. New officers will be elected, also delegates to attend the annual convention in Calgary—S. C. Sorenson, Secretary.

As next week's publication day falls on Christmas day, it will be necessary to publish The Review-Advertiser one day early. All will please remember that copy intended for next week's issue must be in a full day earlier than usual.

The students of the School of Agriculture will hold their closing dance on Tuesday evening, December 22nd. The dance will be preceded by the usual literary program. Dance music will be furnished by the school orchestra. Refreshments will be served. Admission \$1.00 per couple, extra ladies 50c. The auditorium will be suitably decorated for the Xmas season.

Clareholm Elks Lodge No. 124 invite all the children from 5 to 15 years of age to be their guests at a moving picture show at the Rex theater on Wednesday afternoon, December 23, at 2:30. The picture arranged for is Baby Peggy in "A Family Secret" also a two reel comedy. This is the Clareholm Elks treat for the kiddies of Clareholm and district. Be sure and bring in the children and let them have a good time.

"The Crimson Eyebrows" will be repeated by the High School Choral Society on Thursday evening, December 31, at the Rex theater. There were many who could not gain admission on December 1st, and this will be their opportunity.

"Bigger and Better" will justly apply to the second annual military ball to be held in the I. O. P. of H. Hall January 8th if present plans carry. The local Squadron of the 2nd Alberta Mounted Rifles are enlarging on the plans which made their ball such a success last year. Mack's Melody Makers will furnish the latest and best music, local supporters are furnishing a bigger supper, and a more pretentious novelty program is planned. Special arrangements for those who wish to sit out or play cards. Everybody welcome.

The following canvassers have turned in their donations to the Wood's Christian Homes campaign fund: Mrs. M. M. Evans \$13.20, Mrs. J. L. Salmon \$30.50. Each subscriber will receive a receipt from the Wood's Home, Oids.

Constance McAlpine, Sec. Clareholm District.

Resignation of Rev. J. A. Tench, Pastor of the Church of the Nazarene

At the close of the service last Sunday evening the Rev. J. A. Tench informed the congregation that he was resigning from the pastorate of the church in Clareholm, the resignation to be effective immediately after the Alberta district assembly in March.

The congregation is contemplating extending a call to Rev. Percy Batrum of Wampa, Idaho. Since Mr. Tench has been in Clareholm there has been a very noticeable increase in the attendance at the services. The Young People's Society has been wonderfully increased in interest and efficiency. The Sunday school has grown, and in every department of the church a marked improvement has been seen.

Calgary Stampede Film Is Hoot Gibson's Best

Rapid action, beautiful scenes, and a story that holds the spectators enthralled is the feature common to the Rex theater, Clareholm, on December 18 and 19, where Hoot Gibson is shining particularly bright in his latest starring vehicle, "The Calgary Stampede," a Universal-Jewell.

The picture is one which defies criticism and at the same time calls for the free play of superlatives. This is probably the "most-est" picture of the West that has ever been filmed.

Thrills and beautiful scenery—the two requisites of the successful picture of the West—are present in abundance in this picture. Canada in all her glory was never better presented to the screen than through the scenes of this drama of the West which was actually filmed in the Canadian location.

All her beauty has been captured. And her most famous spectacle of the West has furnished atmospheric scenes for this impressive picture. "The Calgary Stampede" is the story about a young man wrongly accused of a crime. Yet to him freedom is more dear than imprisonment and a trial with possible conviction, so he disappears with the Mounted Police on his trail. A cow puncher, he turns to a ranch where he gets a small job. Action and thrills pile up until the Calgary Stampede opens its week of festivity.

Even greater suspense is created here where much of the plot is unfolded amid the scenes of carnival gaiety. Herbert Blache, who directed the picture, deserves credit for not allowing interest in the movements of the players to decrease while at the same time introducing much matter of an atmospheric type. Many directors would have completely forgotten their story with such exquisite play as the Calgary Stampede with which to mold the interim scenes of their picture. Hoot Gibson has an excellent cast supporting him.

New Varieties of Spring Wheat Give Exceptional Promise Of Doing Well in Western Canada

(By L. H. Newman, Dominion Cereals, Ltd., Ottawa)

Among the many new varieties of spring wheat produced by the cereal division of the experimental farms branch of the department of agriculture at Ottawa, two, Garnet and Marquis, are worthy of special mention, since they are practically sure to occupy a prominent place in the cereals of Western Canada. Garnet is the result of a cross between Garnet and Blues; Marquis is a cross between Marquis and Prelude. Both varieties are earlier than Marquis. During the past eight years' test at the branch farms at Brandon, Manitoba; Lethbridge, Saskatchewan; and Lacombe, Alberta; Garnet matured, on an average, eleven days earlier than Marquis. In Manitoba it matures usually around seven or eight days before Marquis; while in Alberta the difference between the two was twelve or thirteen days during some seasons. Garnet usually matures three or four days later than Marquis.

To obtain data from as many sources as possible, a plan of local variety testing was inaugurated in 1924, and continued through 1925. In 1925, 100 farmers tested these two wheats alongside of five or six others. In 1925, 100 farmers tested these two wheats alongside of five or six others. In 1925, 100 farmers tested these two wheats alongside of five or six others.

Fertilizing Value of Wood Ashes

Are Valuable For Neutralizing Acids in the Soil

Wood ashes may be used to advantage as a fertilizer for most crops on light and gravelly soils, or on vegetable lands inclined to be sour. They are especially valuable for clover, corn and mangolds or for orchards and for grapes on sandy loams. In a new pamphlet prepared by Dr. Frank T. Smith, Dominion chemist, farmers are advised to conserve this home source of potash more carefully, not merely collecting the ashes from house stoves but burning the brush piles gathered in clearing land and pruning orchards, and saving the resulting ashes. Storage of a retained potash fertilizer from the weather is essential. There is no more valuable potash fertilizer than ashes, as their content of potash is a soluble form and immediately available for crop use, and besides they neutralize acids in the soil. The potash in wood ashes is lighter than that from hard woods, but Dr. Smith states that weight for weight they are not much, if any, poorer. According to the pamphlet, potash may be obtained free from the publications branch, department of agriculture, Ottawa, 25 to 50 bushels of wood ashes per acre will furnish ample dressing for every light soil. On heavy soils they are not needed as on such they may destroy good tilth. They should be broadcasted on ploughed land in the spring, preferably on a quiet, damp day and thoroughly harrowed in.

Predicts Long Cold Winter

Notes Meteorologist Says It Will Be Followed By Late Spring

A severe winter for the American continent is predicted by the meteorologist, who has long continuing cold waves, broken by warm periods of brief duration, is predicted by Herbert J. Brown, widely known meteorologist. An abnormal condition, he holds, is pointed to by many factors, including the record breaking cold in many parts of the continent this fall, beginning with the first snows in the Northwest September 15, four days before the official end of summer. The winter, he believes, will be followed by a late spring. Primarily, the prediction is based upon a study of ocean surface temperatures as determined by the amount of the sun's heat reaching the earth. This solar radiation for more than three years has been below normal. The present weather situation, he says, is particularly unfavorable in that condition which will interfere seriously with crops, the cold fall and winter in prospect being but forerunners of the next year.

A serious situation developing in the northern hemisphere in the crop year of 1926 to 1927 is in the northern hemisphere in 1927 is predicted.

B.C. Game Preserve

Big Game Is Now Plentiful in District Surrounding Kootenay National Park

The game preserve established by the laying aside of the Banff-Windermere highway as the Kootenay National Park, is proving a great asset in the harboring of big game and a natural supply for the forests and game hunters which surround its boundaries. Moose, deer, elk, and mountain game are reported as numerous, and more hunting of these game animals has been done by parties this past season than at any for several years back.

Where Newspapers Are Cheap News reporters at Soda springs recently exist on what many newly arrived reporters always feel they can fall back on—love and fresh water. The average reporter receives about \$15 a month. Soda has 14 daily newspapers and they sell for about three-fourths of a cent each.

What Spoons Eat

Infant spooners which are animal life on the ocean floor, eat yaks and other animals. Spooners eat, it requires something more solid, and this is brought by the currents which sweep minute particles of food into it. It is, half-sun and half-sun.

Must Have Been Existing Game A game of chess started in 1924 between Ernest Jackson, of York, South Australia, and James McGregor, of New South Wales, Australia, has just ended in a draw. It was conducted by correspondence, moves being made every two months.

Possibilities Of H. B. Area

Completion of H. B. Road Would Be a Factor of Tremendous Importance to the Coast

As soon as the Hudson's Bay Railway is completed, the development problems of that area will solve themselves. In the view of W. T. Carson, of Montreal, a fellow of the Royal Geographical Society, and a recognized authority on the Hudson's Bay area, there are sufficient iron ore deposits above the water level on Nastapoka Island east of the bay, to supply the demands of the North American continent for fifty years, he believes. He adds that he knows from personal observation that the Hudson Straits are open from four to five months of the year, and he has been assured by experienced navigators that the passage through this port "presents no difficulty to anyone who understands the northern and southern channels well but landing the brush piles gathered in clearing land and pruning orchards, and saving the resulting ashes. Storage of a retained potash fertilizer from the weather is essential. There is no more valuable potash fertilizer than ashes, as their content of potash is a soluble form and immediately available for crop use, and besides they neutralize acids in the soil. The potash in wood ashes is lighter than that from hard woods, but Dr. Smith states that weight for weight they are not much, if any, poorer. According to the pamphlet, potash may be obtained free from the publications branch, department of agriculture, Ottawa, 25 to 50 bushels of wood ashes per acre will furnish ample dressing for every light soil. On heavy soils they are not needed as on such they may destroy good tilth. They should be broadcasted on ploughed land in the spring, preferably on a quiet, damp day and thoroughly harrowed in.

There is no doubt that completion of the Hudson's Bay Railway would be a factor of tremendous importance in developing sections of Northern Manitoba, Northern Saskatchewan, Northern Ontario and of the Northwest Territories. There is an immense area centring upon the bay that admits of unlimited possibilities. Completion of the road is just the first step from the point of an expedition alone. The expenditure of a few million dollars should suffice to finish the road and the entire line in running order.

It will devolve upon the Liberals and Progressives in the new parliament to make the most of the interests of the west at heart, to cooperate in the utmost measure in pushing for the necessary outlay on the road to the bay at the earliest possible date. Or will another general election be necessary before the political situation will be cleared for the permit of such action?—Legion Leader.

Women Turn To Agriculture

Do Very Well On Farms By Reason Of Adaptability

Speaking of the accomplishments of women in agriculture at the eleventh annual convention of the Women's Institute of Eastern Ontario, Mr. A. Aiken, of Hamilton, Ont., stated that women, as a race, specialized in poultry. Most women, when children, were brought up on farm tales but they grew older one became aware of the deplorable shortage of prices, and so many turned to agriculture. Women, the speaker stated, do very well on farms because they have a passion for detail which men lack and a genius for feeding because they have always fed, setting the tables of the world.

Silk is the cheapest form of clothing material in Madagascar.

A Poet in the Mountains

From the pen of Michael Hargadon, of Montreal, a true and authentic poet, says J. B. Doland in the "Catholic Register" comes this pretty volume, "Among the Mountains," a collection of seven beautiful poems on the Canadian Rockies. Titles of the poems are: "Banff," "Lake Louise," "Moraine Lake," "Emerald Lake," "Glacier," "Watkins," and "Camp Snow." Above illustration is of Lake Louise in the Canadian Rockies.

What better description for instance, could be given of Lake Louise than the following stanza, taken at random from the poem of that name: "An oval framing of the fairest blue, And best designing that the maker knew. This Lake is God's best picture; that he hung on the mountains at the blue." He would it were, that sometimes he might show, The sun above his masterpiece he knew.

Here is the concluding stanza from a poem on Banff: "There is no grander place to live, And no grander place to die, It would be sweet if we could come With all the wealth of earth And such that heaven supplies,

Farmers Will Grow Corn

Raising Problem To Be Solution Of

Mr. Headley sees rehabilitation for the southeast with livestock, sheep or cattle, with corn growing to supply winter feed. The growers have formed the Alberta Corn Growers' Association and will hold the first Alberta corn show next November in Medicine Hat. Greetings from the corn growers of the sister province of Saskatchewan were conveyed by President Hoffman of the Saskatchewan Corn Growers' Association of Maple Creek, at a dinner of corn enthusiasts.

Mr. Hoffman told of the formation of the Saskatchewan organization three years ago when, owing to dry weather, it was found imperative that some way be found to grow winter feed for livestock and help control soil drifting and other farming troubles with the assistance of the government and the university. This, with a donation of \$20 a year for five years from the Ogilvie Milling Company, enabled the association to hold its annual show. Although the show costs from \$2,000 to \$2,500 annually.

How Homesteader Succeeded Dairy Producers Helped to Make Farm Payable. The six-year-old son of Mrs. M. E. Warren Nugent, one of the many war brides to accompany their husbands to the Alberta farms, has been a Canadian soldier, but the Edmonton journal recently giving a brief account of how homesteading can be a prosperous business, with little initial capital, industry and the little to succeed.

According to Mrs. Nugent, the prospects of getting a living on her husband's 160 acres were not good. The year 1919 was the worst she homesteaded in 1919. Now the land is netting them an excellent income, and this is how it was done: The Nugents first acquired three good cows and several pure-bred hens to supply their house wants and steady money. The store bills were paid with egg money, implements with cream checks. Each year additional land was cultivated on this system.

The "dollar string" has now grown into five horses, 15 cattle, five cows, three hogs, a flock of hens, and a full line of farm equipment. The "dollar string" has now grown into five horses, 15 cattle, five cows, three hogs, a flock of hens, and a full line of farm equipment.

Future Expansion In Canada Depends To A Large Extent On Agricultural Development

Corn and Sunflowers

On Different Soil

Sunflowers More Profitable Crop Than Heavy Land

Average yields of corn and sunflowers for four years at the central experimental farm at Ottawa, on sandy loam, have led to the Dominion field husbandman expressing the opinion in his report for 1924 that there is no object in changing from corn to sunflowers on land where the former yields satisfactorily. Corn is, moreover, he adds, an easier crop to handle than sunflowers and produces a slightly better quality of silage. On sandy loam the average yield in the quarter tons of years of corn was 13.4 tons and of sunflowers 21.6 tons per acre, but the latter having a larger percentage of moisture contained a lower percentage of dry matter.

On heavy clay the average yield in green weight of sunflowers during the four years of the experiments, was 19.4 tons and of corn only 9.3 tons per acre. In actual dry matter sunflowers have yielded 2.31 tons, corn yielded only 1.55 tons per acre. It is clear, the husbandman points out, that on such heavy land sunflowers are a much more profitable crop. Another interesting fact is that on the sandy loam the rows of sunflowers were not thinned the yield was 19.4 tons per acre, while where thinned to six inches apart the yield was 14.2 tons per acre.

In the report, which can be had free on application to the publications branch at Ottawa, graphs are given, indicating at a glance the yields of water, dry matter and green weight in tons of both sunflowers and corn on every clay and fertile sandy loam as well as a great deal of other valuable information.

Butter Market Is Strong

Volume of Creamery Butter From the Prairie Provinces Continues to Increase

The future of dairying in the west depends upon the market for its products. Problems of production are being gradually solved and the volume of creamery butter manufactured in the three prairie provinces will likely exceed 45,000,000 pounds this year.

But the market has not yet reached the point where it would stimulate butter manufacturing to a point of over-production. It is true that higher prices levels will greatly encourage dairy development, but there is no immediate danger of over-production. Creamery butter is a commodity of international trade and the surplus from the prairie provinces is insignificant in the world's butter stock. Last year the Dominion imported over 600,000 pounds of butter, while the exportable surplus in this whole of Canada would not exceed 25,000,000 pounds.

So long as the quality is right, the world's demand for butter is not likely to be affected by the surplus from the prairie provinces. A constant supply with uniform quality will secure the position we have obtained in that great market, and although competition may produce irregular prices there does not appear to be any danger of over-production at present.

World's Wheat Crop

300 Million Bushels More Wheat This Year Than in 1924

A world wheat crop of 300,000,000 bushels, compared with 269,000,000 bushels of last year's crop, was forecast by the agricultural department on the basis of estimates received up to November 11. "Wheat production in 22 countries of the northern hemisphere," the department's announcement said, "is expected to reach 295,000,000 bushels compared with 264,000,000 bushels in 1924." The Canadian crop was placed at 42,000,000 bushels, compared with a previous estimate of 39,000,000 bushels and last year's harvest, 25,000,000 bushels.

Record Cattle Shipments

This year's cattle shipments from Canada to Great Britain will considerably exceed the record of 1924. While the British demand is at present easing off somewhat, the total shipments for 1925 will be a record, the month of January well over 10,000. The total value of the cattle exported from Canada to Great Britain for 1925 is estimated to be \$11,000,000 for the year.

An elevator in a London hotel has a list spread with a rate of 70 mils a bushel.

While immigration to Canada for the first part of the current year has been at a low level, the Dominion government is justified in the type of new immigrants that it has been receiving. If the movement has not been as voluminous as previous years it has largely been directed into channels where it will do the greatest benefit to the Dominion. Government statistics show that 65 per cent. of the immigration to the Dominion from overseas in the first three months of the fiscal year and 61 per cent. of that from the United States was agricultural.

The trend is gratifying in view of the fact that future Canadian expansion will depend on the agricultural development and that it is usually estimated that a settler placed on the land makes way for another in the various phases of Dominion activity providing for the farmer's multifarious needs. No matter what the state of Canada's economies in other directions, agricultural opportunity always exists, both for the farmer and his helper. There are always adequate opportunities for the farmer to meet the demand for farm labor in never failing.

Leading the general view that homesteading is a phase of land settlement belonging to the past, there are yet large blocks of land containing millions of acres in the Dominion of Western Canada, and new sections are periodically being opened for filing. There are also large tracts of land in the Canadian Pacific Railway and other interests where farms are procurable on terms of credit on easy terms. There are, in Western Canada, some 25,000,000 acres of land of existing railroads and within fifteen miles of them. In the surplus land, there is one way and another which could provide homes for more than 300,000 new colonists.

That homesteading is still an important factor in Western Canadian land settlement is evident from the fact that in the fiscal year 1924-25, 24,000 entries were granted in Western Canada, aggregating an approximate total of 1,000,000 acres. In addition, 710, soldier grant entries of 112,480 acres, making a grand total of 256,480 acres so settled. In the first six months of the present year, 1,223 homesteads were taken up in the area, representing 254,850 acres, and 235 soldier grant entries representing 20,600 acres, making a grand total for the half-year of 275,450 acres added to Western Canadian settlement.

It is true that in Canada always exists despite fluctuating conditions in other phases of Dominion life, a steady and reliable advantage of in a greater or lesser degree. The healthy and optimistic state of Western Canada as a result of the steady growth of its dairy division, in the coming year, bring more individuals to realize this agricultural opportunity and to actualize it, and farmers in training through agricultural labor.

Field Husbandry

Government Report Just Issued Contains Valuable Information

The report of the Dominion field husbandman (Mr. E. S. Hopkins, R.S.M.) for 1924 just published at Ottawa is replete with interesting supplies meteorological records for the past thirty-five years and goes largely into the cost of producing oats, hay, silage, corn, mangolds, potatoes and other crops. It then furnishes particulars of crop yields at the central experimental farm at Ottawa, and illustrates, how weeds are controlled, improvement of tilage from crop to crop, and the results of sunflowers and corn on different soils, rotation of crops, farm manure and commercial fertilizers and the work of the Dominion field study station. An account of soil moisture investigation in the prairie provinces in 1924 is also given. The general condition of the country. Graphs are also given showing at a glance the average yield of various crops at the central experimental farm compared with Ontario generally and of the relative yields of corn and sunflowers on heavy clay and the sandy loam, indicating at the same time the respective quantities of water, dry matter and green weight in tons.

Canadian Newspaper Goes To U.S. The United States gets two copies of its newspaper from Canada, either in the form of pulp or in finished pages, according to the president of the United States. The time is not far distant," he stated, "when the United States will be entirely dependent upon Canada for its newspaper."

The very fine mild weather has continued throughout the past week. What wouldn't California give for such glorious December weather!

Geo. P. Smith, formerly minister of education in the provincial government, is under arrest at Edmonton charged with stealing several thousand dollars from the province while in office.

Recent Births

To Mr. and Mrs. J. Hedin, a daughter.
To Mr. and Mrs. C. Weidner, a daughter.
To Mr. and Mrs. Thor, Brown, a daughter.
To Mr. and Mrs. Sidney Lamb, a daughter.
To Mr. and Mrs. C. Mitchell, a daughter, at Clareholm hospital.
To Mr. and Mrs. W. Fleming, a daughter.
To Mr. and Mrs. Dalluran, a daughter, at Clareholm hospital.

McLaughlin Buick
Demonstration

On Wednesday R. V. Price of the McLaughlin Motor Car Co., Calgary, gave two very interesting talks on automobiles at Quality & Yokom's garage.

To assist him in his talks he brought with him a stripped chassis of a special six "Better Buick". Emphasis was laid on the units that go toward making up a good automobile and in choosing a car to choose it in the same way one would choose a good house.

Triple sealed motor, i. e., oil cleaner, gasoline strainer, and air cleaner, Harrison radiator, Jacobs steering gear, Delco starting, lighting and ignition system, torque tube drive, full floating axle, cantilever springs, valve in head motor, Fisher bodies with seven coat Duco finish, and exceptionally low prices, were some of the points brought out in favor of the 1926 "Better Buick."

Chinook Gossip

Otto Henker installed a radio at his home last week.

Gust Radke, who was called to Portland, Oregon, by the death of his father a week ago, returned home last Monday.

Art Edun is spending a few days in the neighborhood. Art is one of the retired farmers of the district.

Court Henker bought a half section of land from his brother Dick a few days ago.

Parties of the good old fashioned kind have been got up in this district since threshing has been completed this fall.

Mrs. E. H. Ait who has been visiting her sister Mrs. Smith in Edmonton for the last three weeks, returned home last Monday.

Uncle Dad and Aunt Ma who have been on their honeymoon in Minnesota for the last two months, returned last Saturday. Married life certainly agrees with them as Uncle Dad gained ten pounds in weight while Aunt Ma exceeded Uncle Dad by two lbs.

Oh well, the gentler sex always exceeds the opposite when it comes to gaining weight in married life.

WARNING TO USERS OF RADIO

All Radio Receiving Sets
MUST be Licensed

Penalty on summary conviction is a fine not exceeding \$50.00

License Fee \$1.00 per annum

Licenses valid to 31st March, 1926, may be obtained from: Staff Post Offices, Radio Dealers, Radio Inspectors, or from Radio Branch, Department of Marine and Fisheries, Ottawa

The proceeds from license fees are used to control broadcasting and to improve broadcast reception and conditions

A. JOHNSON, Deputy Minister of Marine and Fisheries

Harness & Shoe Repair Shop

Expert work on harness, shoes, bags, suit cases, and all makes of sewing machines.

Large assortment of woolen gloves, mitts, socks, and harness.

Next door to Queen's Hotel.

L. LANG, Clareholm.

Glorious Hair In 90 Days

Or Money Back

Women who wish to stimulate the growth of their hair should use Van Der Grintz Scalp Massage. A glorious head of straight, wavy hair will grow on the scalp. Comes fitted with a patent rubber applicator that forces the treatment directly to the roots of the hair. And the flexible portion of the applicator brings a healthy circulation of blood to the scalp, and gives you the money back if it fails.

Some Poultury Feeding Tests

Relative Value of Best Versus Skim Milk Is Shown

A couple of weeks' feeding tests with poult, ten birds in each pen as nearly equal in type and breeding as possible, at Napier, N.S., Dominion experimental farm, are of much interest and value. Two pens were used in each test, which specially extended over seven and eight weeks. The superintendent's report for 1924 details in full are given of the results in 1923-24 as well as the average for three years. In both cases both the cost of feeds and eggs values are included in the particulars furnished. The first test, which commenced from November 1 to May 31, was to determine the relative value of best versus skim milk when added to the layer rations. The three-year average of best scrap was 62.5 eggs with a profit per bird of \$1.07 in pen No. 1, and of skim milk 53.7 eggs with a profit per bird of \$1.05 in pen No. 2. If the increased profit per egg consumed can be credited to the skim milk, says the report, when mixed with the eggs, it has an average market value of \$1.21 per hundredweight.

Test No. 2, extending from November 1 to April 29, was designed to ascertain the relative value of home mixed versus commercial eggs in three economic egg production. The three-year average of pen No. 3 of eggs laid with home mixed was 680 at a profit per bird of \$1.07, and of pen No. 4 with commercial feed materials 607 at a profit per bird over feed cost of \$1.07.

In each case the rations supplied and the constituents of the home mixed, as well as the methods adopted in feeding, are given in the report, which can be had free on application to the publications branch, Ottawa.

Leaves Tax On Forgetfulness

France Has Devised New Way Of Raising Revenue

A tax on forgetfulness is the most up-to-date thing in French revenue novelties.

The gentleman who leaves lost certificates in his taxi-cab and madame who forgets everything from her cigarette case to her pocketbook will now pay rather heavily when they claim their belongings at the lost property office in the police headquarters.

Money and securities will be returned to their owners at a charge of 4 per cent. of their value, "except anything having no intrinsic value" is redeemable on the same terms. "The 'no intrinsic value'" is expected to kill a very large number of the "no intrinsic value" items sold in the matter of lost jewelry. For every other article, new or nearly new, two francs are charged; for everything else, one franc.

Made Long Journey For One Engagement

Violent Crossed Ocean to Play One Night at New York Reception

When the Canadian Ambassador's daughter recently at New York from Southampton and Cherbourg, one of her first calls, passengers on the ship, Russia, an English "telly" player, 22 years old, who came over to play for one night at the home of Mrs. J. H. Thomas, 155 East Ninety-third Street.

He sailed the following day for Plymouth on the French liner Paris. The young musician is the grandson of Henry Russell, who wrote "A Life on the Ocean Wave." "Cheer, Boys, Cheer," and other ballads sixty years ago. He is a nephew of London King, the composer.

Russell said that as he had fifteen days to fill in his winter programme he had accepted the invitation of Mrs. Thomas to come to New York and play at her reception.

Heroic C.P.R. Fireman

For the fifth of a long list of \$1,000, given weekly by a large Chicago organization for a fund of bravery, comes to Canada. It will be presented to J. H. Partridge, fireman on the Canadian Pacific Railway, whose run is between Calgary and Field on the main line. The presentation will be made as a reward for saving the lives of seven men who were in danger from a huge rock and mud slide on the Field Hill, August 21st.

Need Faith in Canada

Count de Tager, of Cromwell Hall, East Gloucester, Sussex, England, who for the past thirteen years has made the welfare of Canada his chief interest in life, expressed, in an interview recently, his firm belief that the future of Canada should give cause for nothing but optimism if Canadians will only have faith in their country.

Four-fifths of the upholstery leather manufactured in the United States is used for automobiles.

Simple Remedy For Burns

Nothing Better Than Dry Baking Soda When Injury Is Slight

Dry baking soda is an excellent remedy for slight burns where the skin is not broken.

The soda should be spread on the burn and then a clean bandage applied.

When the flesh is broken some city substance should be used. This substance should be thoroughly cleaned and all air should be excluded from the wound.

Clean olive oil, or vaseline, is good. Vaseline should be applied in one of these and gently wrapped around the part.

If the burn is a very serious one while the doctor is being sent for, bathe with a boracic solution. Boric is cooling and soothing.

Never wrap fingers together when burned. Wrap separately. If wrapped together they will stick and cause great pain.

The same rule applies to toes also. Wrappings should be soaked in alcohol. Cotton should be placed under the bandage to keep off the air and thereby relieve pain.

Lard, mixed with flour, is a good cure for burns.

Also turpentine, applied to a burn where the skin is not broken, is good.

The White Collar Job

Office Man Resigns to Take Up Work

A Massachusetts city engineer who has been losing a \$200,000 road job for \$1,500 a year, has resigned and gone to work with a pick and shovel on the road whose construction he formerly supervised. For this work he gets 65 cents an hour, and on this he says he can live on more money than he could on a salary.

It is becoming more and more difficult for cities and states to secure efficient engineering forces, for the reason that the pay that was once deemed adequate is no longer sufficient to enable those who receive it to meet expenses. The old idea that a white-collared job at a low salary was better than an overall job at high wages has been abandoned pretty generally since the cost of food and clothes has advanced, especially those who work with families, must have money, and they no longer feel that it is necessary to earn it in clean clothes.

It is still true that the engineer who is engaged in the pursuit of his profession has a better chance of ultimate advancement means waiting, and waiting is not pleasant with the wolf just a few paces behind.—New York Herald-Tribune.

Rome's Beggars Are Wealthy

Police Say Some of Sorriest Looking Have Amassed Fortunes

The police have found that many of the poorest and most pathetic appearing street beggars in Rome are some of the city's most opulent citizens behind the walls of their homes.

Many of these aged mendicants were searched and his pockets alone contained about \$30 as one day's reward for the city's police. He was a proprietor of dwelling houses, another an owner of a lively stable that boasted several horses and carriages, a third was a professional moneylender at various rates, and a fourth was a frequenter of one of the most expensive restaurants in the city.

Serao Sarsini, pauper and miserably dressed in tatters, died suddenly on the street of heart failure. His body was gathered up unceremoniously by enablers and buried in the public cemetery for the destitute. It was later learned that Sarsini was a member of one of the most noble of Florentine families, and that he bore the authentic title of count.

Queen Starts Bank Account For Maids

One Reason Changes Are Not Frequent In Royal Household

Queen Mary, famous for her domesticity, has disclosed how she manages the various palaces with but very few changes of maid servants. One of the very first things the royal patroness does when a new maid arrives is to take a bank account for her. There are thirty or forty maids. The Queen keeps all her maids by their names and takes a personal interest in them. Once the bankbook is in the hands of a maid servant, she encourages her in every way to make the savings grow as rapidly as possible.

Predicts New Industry For West

Creditor of a new industry in Western Canada covering a product which is now imported into this country to the value of some five million dollars annually, is foreshadowed by the samples of hemp now on display at the Montreal Station, Montreal, according to G. G. O'Mahoney, development engineer, Canadian Pacific Railway.

Sir Thomas Esmond, Bart. of Dublin, Ireland, and the first senator of the Irish Free State to visit Canada, has just enjoyed his twentieth annual hunting and fishing trip in the Dominion.

With Lady Esmond he is the greatest game hunter now in Canada, N.B.

During a fortnight spent in British Columbia, Sir Thomas and Lady Esmond enjoyed the hospitality of one of the Canadian Pacific Railway's camps at Bull River, where Sir Thomas secured the big stag shown in the picture. He is known throughout the British Empire as a crack shot and keen snarer, and while on the continent will procure eggs of the locket salmon with which the Irish

New Use For Noxious Plant

Chinese Tree of Heaven Will Produce Paper Pulp

The Chinese "tree of heaven" will produce paper pulp of good fibre length. Whereas it was about to be condemned as a noxious plant, it may in later years help to solve the problem of wood shortage for paper manufacturers.

The tree's paper pulp possibilities were discovered in experiments conducted by the Pennsylvania department of forests and waters, cooperation with the forest products laboratory at Madison, Wis. As a result, the experiment will plant thousands of alnus (tree of heaven) seeds which in 25 years should produce 4.3 cords of wood to the acre.

The tree grows rapidly and produces a prolific crop of seeds. The first tree in Pennsylvania was planted in Philadelphia about 100 years ago. From this and others set out in various parts of the state for ornamental purposes, it has spread so quickly that, where it grows in thickets, its aggressiveness has begun to crowd out native trees.

Measurements showed that one sprout grew 12 1/2 feet in a single season. From these measurements it was found that in 25 years the average tree would be 60 feet high and 10 inches in diameter, allowing for a slow growth as the tree matures. At a tree would produce about 1,000,000 two-weight seeds annually. These are light, can be carried by the wind and are not objectionable to the trees found in isolated places.

Feeding Laying Pullets

Value of Different Supplements In Conjunction With Regular Rations

An experiment was conducted during the winter of 1922-24 at the Brandon, Man., experimental farm to determine the value of different supplements in conjunction with the regular ration. Alfalfa leaves, mangels and canners' waste were the supplements used and were fed to three pens, two other pens being used as checks. Specially good results were obtained from the alfalfa leaves, which were fed in an open rack and kept continuously before the pullets. More eggs were produced and consequently greater profit over cost of feed was shown. The canners' waste, which was from the carcasses of an old cow that would bring very little in the market, was soaked and mixed with the mangels, the soup therefrom being used to dampen the mash. Such meat can be profitably fed to pullets. The mangels, which were split and fed fresh each day, as much as would be consumed, while showing a profit over the check, were the poorest results of the three supplements.

"Bootlegging" News Is Latest

Bootleggers have made their appearance in Italy, but the Italians, instead of illegal beverages, sell newspapers which exceed the limit of circulation allowed by the Fascist government. They have come into existence as a result of the Fascist laws by which issues of newspapers containing material offensive to the government are suppressed and sold.

Advises Use Of Citrus Fruits

Will Ward Off Ravages of Time Says German Scientist

The generous use of citrus fruits in the diet, says a German scientist, will do much toward warding off the ravages of time. In support of his theory he points out that they are bringing about the formation of deposits of mineral matter in the body which is not readily dissolved by ordinary foods. Citrus fruits, he said, found in lemons, oranges and grapefruit, is the best and most available solvent of these deposits.

Of course the objection, which will be immediately raised by the misinformed is that with advancing age the body cannot stand so much acid. That those who put forth this contention only show their ignorance. Scientific experiments have demonstrated that, although citrus acid is an acid, its reaction in the body is alkaline. For this reason many physicians recommend frequent drinking of orange juice for persons troubled with over-acidity.

Measurements of this alkaline reaction the citrus fruits in some form should be served as an accompaniment to meat dishes to counteract the effect of acids formed by these heavy dishes. With your meat course serve a light, delicious lemon tea or an orange drink. If you are a fan of your fish with a lemon tartare sauce or have lemon pudding, for example, for dessert.

So instead of spending your money for facial "lifts" and "fills" and all that sort of thing, just eat properly. In time the beauty surgeon may perfect their art to the point of infallibility, but in the meantime, proper diet and healthful living will remain the most potent weapon against the approach of wrinkles, stiff joints and old age.

Nature Takes No Excuses

Not Tolerant of Errors and Penalties Is Death

Nature's justice is as merciless as nature's. A bus driver with a load of school children beat a train to the crossing, and was fined \$60 for his recklessness.

Nature's penalty, if it had been a second slower, would have been death for him and many of his innocent charges. Nature takes no excuses and has no tolerance of "human error." Most disasters are nobody's fault.

In nature's court, the penalty of honest error is death.—Soo Star.

Big Elevator At Coast

To Give the Saskatchewan Elevator a terminal on the Pacific coast, plans are being made for the construction of the largest terminal grain elevator in the west, according to Mr. J. A. Maharg, president of the company, who was in Vancouver in connection with arrangements for the construction of the new elevator.

The terminal on the Pacific coast, plans are being made for the construction of the largest terminal grain elevator in the west, according to Mr. J. A. Maharg, president of the company, who was in Vancouver in connection with arrangements for the construction of the new elevator.

Up to October 11, Manitoba exported 12,173 borse. It was valued at \$228,352 pounds, of the value of \$228,352. This represents 24 per cent. of the total exports of the province for the whole of last year.

Makes 20th Annual Hunting Trip

Free State Fisheries Will Replicate the lakes and streams of the South of Ireland

Lady Esmond, the first senator of the Irish Free State to visit Canada, has just enjoyed his twentieth annual hunting and fishing trip in the Dominion.

With Lady Esmond he is the greatest game hunter now in Canada, N.B.

During a fortnight spent in British Columbia, Sir Thomas and Lady Esmond enjoyed the hospitality of one of the Canadian Pacific Railway's camps at Bull River, where Sir Thomas secured the big stag shown in the picture. King George Is Good Shot

Still Retains Skill He Showed In Young Days

For a few days the Prince of Wales had to share the sporting hunt with his father, who has been at Eton Hall in Suffolk, to visit one of his richest subjects, the Earl of Fife, and to do some hunting. The earl's preserves include thousands of acres of land that is too poor to be farmed profitably, but from which a bag of 500 pheasants and 500 partridges has been known to fall to half a dozen sons in a day's shooting.

The earl, who is 78 years of age, has travelling licence to accompany his hunting parties and other arrangements on a similarly luxurious scale, but butts throughout the estate are connected by telephone with the main hall. In his youth, King George was one of the crack shots of the kingdom and still is something of a sharpshooter.

Depends On Imported Wheat

If anything happened to the Free State's foreign wheat supplies the people would be without bread for fifteen days, it is estimated, it was stated by the chairman of a farmers' conference. The average under wheat has declined from half a million to a quarter of a million since 1913. The farmers said that wheat growing did not pay.

Winter Work On Farms

Harvesters desiring to stay in West Canada are not experiencing much trouble in finding work. In one day 150 harvesters were sent out from the Alberta provincial labor bureau to jobs in the southern part of the province.

Urges Canadian Envoy At Washington

"Canada should have an ambassador at Washington," declared A. B. McMaster, K.C., and ex-M.P. for Brant in an address at Montreal. He substantiated this contention as his first and strongest impression gathered at the recent Interparliamentary Union Congress in Washington, which he attended as one of the Canadian representatives.

Illustrate Mayor In France

At government offices in Paris which have to deal with local administrative affairs, it is not unusual to find official documents on which space for the mayor's signature is filled by a cross with the regulation phrase, "States he cannot write." The illustrate mayors living mostly in small and remote villages.

Taken Of Friendship

Ernest Howard, British ambassador to the United States, arrived at Columbia, Mo., to present a memorial stone to St. Paul's Cathedral, London, to the Canadian Museum of Natural History. The stone is a token of friendship from the British to the United States journalists.

Way To Be Happily Married Is To Obey The Laws And Pay Attention To The Laws

The way to be happily married is to obey the laws and pay attention to the laws.

Discover Sparrows Have Good Quality

Care For Orphans of Their Flock Says Jack Miner

Jack Miner, the lover and student of bird life, tells a very interesting story to show the good side of an unpopular bird. Miner himself doesn't really like English sparrows but calls them "flying rats." But he has learned that they have one good quality. They care for the orphans of their flock.

He wanted to get rid of a sparrow family that had built a nest in one of his birdhouses. He placed a snare over the door of the house and in that way caught both the mother and the father bird when they attempted to leave their nest.

In due time the baby birds in the nest began crying for food. Before he could remove the unfortunate orphans and dispose of them, Mr. Miner had reason to believe that a father English sparrow had gone in with food for the helpless family. He set his snare again and waited. Sure enough, out popped the head of a kind-hearted feathered neighbor, and the sparrow family that he had trapped earlier.

To make a long story short, Mr. Miner caught seven fathers that day. Every one of these old English sparrows had heard the nestlings' cries of distress and had gone to feed them. Thus it happened that, taught by the seven fathers, Mr. Miner credits these unpopular birds with one good trait—YOUTH'S COMPASSION.

Practically every line of business enters, directly or indirectly, into the making of our forests.

Whether the areas burned over by forest fires are great or small, they represent one of the costs of doing business which cannot be avoided by the producer. When figuring on the value of his natural resources as a basis for national wealth.

Explained the Mystery

Small Girl in Toronto School Had Her

A very small young lady at school in Toronto saw her companions depositing money in The Penny Bank, and, not being able to do so, she brought a battered nickel to the teacher's desk, received her passbook and was duly credited with the amount. When to her, the teacher class was made up at the head office a few days later a shortage of five cents appeared. The teacher was asked, in the usual course, if she could suggest the cause. She searched her memory, but the inquiry of the teacher if the nickel had been found. The answer was, No.

Thinking day came again. The children, a usual, brought in their savings—two cents, five cents, ten cents, or a "quarter" as they call it—and again appeared the small lady. She put down a five-cent piece and presented her book.

"Majesty," said the teacher, "that looks something like the nickel you gave me last week."

"It is the same one. I kept it to make sure."

"Where did you get it, child?" was the surprised query.

"I took it back last time when you were down with it."

The teacher explained that the money was given to the bank to keep for her, so that it would not be lost—and the five-cent shortage was no longer a mystery.—Toronto Mail and Empire.

U. S. and Agitators

Will Curb Propaganda Which Has Become Dangerous to the State.
A growing impudence is manifest in the United States with the malignant element of the population, mostly of foreign birth or descent, who take every opportunity of maligning the state and its institutions while enjoying privileges unknown in the countries of their origin. A series of recent events indicate that the long-suffering authorities are nearing the limits of toleration for the disgruntled agitators who presume to dictate what governmental policy should be upon matters vitally affecting the welfare of the nation and the preservation of the American spirit. The attempts of New York groups of irreconcilables to annoy and insult distinguished citizens or visitors have been receiving adequate police attention of late weeks, while the raids made by Scotland Yard upon Communist headquarters indicate an intention to curb propaganda which has become dangerous to the degree of danger—Montreal Gazette.

Diet and Disease

Inquilling the Fundamental Principles of Food Chemistry in the Public Mind

Dr. William Arbuthnot Lane, of London, tells the American College of Surgeons at Philadelphia that 95 per cent. of all human beings are eating themselves into all kinds of diseases. Says he: "It is not an exaggeration to say that we suffer and die through the ill which originates in our alimentary system."

With this opinion Dr. Charles Mayo and most of America's greatest surgeons agree.

Food chemistry has become the greatest single factor in the prevention and cure of disease.

And, within the next few years, the first and foremost task of the medical profession will be to install the fundamental principles of food chemistry into the public mind. Once the world is taught how to eat, hospitals and operating theatres will be out of business.—Vancouver Sun.

Reduce Butter Output in England

English Farmer Can Make More Money Selling Milk
English dairymen, dairymen, whose pink cheeks and fair complexions have for generations been at once the envy of their city sisters and the inspiration for countless artists and poets, may now be a help to the world and all because the English farmer has found they can make more money by selling their milk than they can by milking butter.

It takes two and a half gallons of milk to make a pound of butter with which the farmer can get his milk into the public mind. Even in summer he can sell his milk in the cities for a shilling a gallon, so he is much more to be made by the latter transaction. As a consequence farmers are discarding their butter-making apparatus and are buying back many cows for their own use. The importation of butter into Great Britain is increasing.

Believe Alaska Was

Once Tropical Paradise
Prospectors Plan to Make Further Investigations Next Summer

Buried tree trunks found in Alaska have sent scientists wondering whether Alaska was once a tropical or semi-tropical country. Prospectors who recently returned from the interior brought with them samples of sand and bark of strange trees which they had found at the bottom of a shaft they had sunk in quest of gold. The stranded Kohala River, a traveler 700 miles south. Here in numerous holes they found deep sand in layers shrouded to the depth of great trunks, buried trunks of trees with rough bark as of fruit trees and long wide blades of grass like bamboo, sorghum or papaya. The size of the vegetation indicates a former tropical climate. Further investigation is planned for early summer in 1926.

Fur Coats Popular

Canada is taking on the fur coat in preference to the fur-lined variety, according to the bureau of statistics, the manufacture of fur coats, both women's and men's, is increasing, while that of fur-lined coats is declining. Last year, there were 46,000 women's fur coats in Canada, but only 899 women's fur-lined coats.

If all were qualified to do something useful, where would the world get critics?

When a woman decides that clear sales aren't good for the carpet, the luncheon is over.

A bee dies when it stings you. Now you could be crossed with the man who sells stings.

1207

Smartly Simple

A triumph of chic and sturdiness, in many instances, it is most convenient that every smart wardrobe should contain at least one frock of this type. In every detail it illustrates the theory that the long line is the shortest route to sturdiness. Two inverted plaits extend full length on either side of the front. A straight piece of the material is added to form a trimming band two inches wide and placed beneath the collar and placed before it is stitched. Flat button bands trim the band. The back is plain and extends over the shoulder, fastening onto the front in yoke effect. The V-shaped neck opening is very becoming, and is finished with the latest in a series of effects. The simple design of No. 1207, which is in sizes 34, 36, 38, 40 and 42 inches bust size 38 requires 4 yards of fabric, or 1 1/2 yards of 44-inch material, and 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents.

Motor Car Runs On Storage Battery

A radio report from Moscow says that a man named Joffe, a doctor of science, has invented a storage battery, can run a motor car for 10 days and nights at highest speed without recharging. The report says that the battery is so small that it can be carried in a person's pocket.

It is estimated that less than 3 per cent. of successful men remember anything about algebra.

ECZEMA OVER
FACE AND BODY
Nearly Driven Crazy By
Itching, Cuts and Hives

"I was bothered for a year with eczema all over my face and body. It was in places and I kept it by scratching for I used to drive me crazy itching, and it kept me awake nights."

"I was treated but I did not help me at all. I heard about Cuticura Soap and Ointment. I bought them, and used them for a few days, and now my face and body are clear and I was healed." (Signed) Alice Macdonald, Vermont, Sept. 16, 1924.

Clear your pores of impurities by daily use of Cuticura Soap with Cream of Cuticura. Wash with Cuticura to soothe and heal. Cuticura Talcum is fragrant and refreshing. See dealer's name.

C.P.R. Weston Shops

Building Covers 180 Acres and Property Represents Investment of \$400,000

The Young Men's Section of the Winnipeg Board of Trade were the guests of the Canadian Pacific Rail way at an informal luncheon recently, at which an opportunity was given them in an audience to see through the Weston shops.

The construction of these shops was completed in August, 1904, and completed July, 1905, representing an investment of \$400,000. The property appropriated for shop purposes was 320 acres, and 100 acres are actually at the present time being used for shop purposes. The plant consists of 13 different shop buildings and one central store or supply building. There is 30 miles of service, industrial tracks and paved roadways used in conjunction with transportation of material and supplies. The machinery equipment consists of 1,179 machines, 443 electric motors representing a total horsepower of 4,200, better power plant generating 2,500 h.p. consuming daily 250,000 gallons of water. There are 22 miles of water, steam and oil and air pipes used in connection with the utilities, and the average number of men employed is 2,500. The cost consumed each day during winter months averages 75 tons. The monthly payroll amounts to \$250,000.

The principal buildings consist of a general store building carrying a stock of material representing \$400,000, with an annual turnover of \$5,000,000. This iron foundry, with a capacity of 400 tons, is at present turning out 100 tons per day in conjunction with the foundry there is a pattern shop in which all patterns are manufactured and stored, holding patterns to the value of \$75,000.

The locomotive shop has an output of 30 locomotives per month, and in addition contributes to the output of manufactured material to the amount of \$125,000 each month. The blacksmith and forge shop keep up-to-date in the matter of machinery and tools, and is fully equipped with dies and jigs. The frog shop, from a small beginning as a repair shop only, has developed to such proportions that all frog, new and re-used, required for use on western lines, are now handled in this plant. The cast and steel coach shops, with a capacity of 50 general repairs each month, are worked at their peak during the month of November, giving employment to a large number of men. The wood mill shop is in every respect and in addition to taking care of the requirements in the shop, manufactures, takes and parts required in the repair of the locomotives, taking the work of the territory as far west as Moose Jaw.

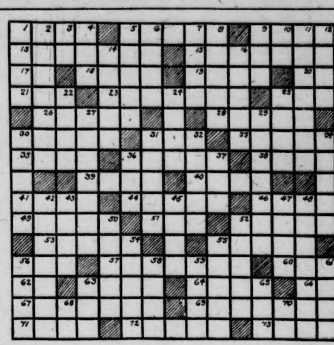

As a result of the policy of the management in the matter of reclamation of material, and with the extensive use of the electric welding process, large quantities of scrap metal are produced, and the scrap metal is re-used in the various shops.

The company and its officers, by their foresight and planning, encourage all suggestions offered for the welfare of the employees. The Weston shops and surroundings are kept in perfect condition and during the winter season are beautified by having a large number of flower beds and plots in the different parts of the ground, in which the most flowers are grown and kept in good order. The city arrangements get special attention. The management of the city health department, special first aid stations in the matter of safe practice, the use of machines and special dangerous places, is a matter of importance with each officer and special instructions are issued in connection with them. A large new room is supplied on the ground for the use of the men, which is divided into smoking, betting, reserved for men who purchase their dinner complete, cafeteria system also provided. Dining rooms are subdivided for smokers and non-smokers. A means of heating tea and other food brought in by employees is also provided. The employees are given up-to-date newspapers, magazines and periodicals. A large room for reading and writing is provided. The Weston shops and all its incidents to the library proper, run by the company.

The section of the St. John Ambulance Association is part of the welfare features of the plant. A team from the Weston shops being successful in winning the system championship in competitive recently held in Montreal. All the necessary equipment, bandages, etc., together with the supplies for the company for instruction and practice is provided by the company. The management encourages all sports and other sports by liberal contributions to the team and the team to the apprenticeship system and have put in effect a system that provides for the welfare of the employees. The Weston shops are well equipped on the shop property, where the mechanical drawing, practical mathematics and shop practice. This structure is given during the working hours and while under way.

The pressure of outflowing sap in injured trees in the spring may reach as high as 100 pounds to the square inch or equal to the blood pressure in an ordinary locomotive.

OUR CROSSWORD PUZZLE

- | | | |
|--------------------------|------------------------------------|------------------------------|
| Horizontal | 55—Substance exuded from plants. | 41—Admired. |

| | 75—Cut in two. | 61—Teaser. |
| | 76—Pertaining to a knot. | 62—Stagger. |

Gives Good Advice

Sir Robert Horn Returns From, Can. Ada Urging Britons to Emigrate
"I have just come back from Canada," declared Sir Robert Horn, speaking in Scotland, "and I cannot imagine that any man here would rather have a precarious existence, dependent upon charity, than go to the great Dominion and gain a new existence for himself by the sweat of his brow."

The foregoing sentiments were broadcasted over Great Britain by Sir Robert Horn, chairman and editor of the Daily Express, who added the personal suggestion that as Sir Robert Horn was now free of government office he might devote his administrative and organizing ability to overseeing a scheme under which desirable people could emigrate to Canada with good chances of success.

Winter Sports in Rockies

"Nomads" to Make Pack Horse Trips to Yoho Valley
An organization to be known as the Nomads has been organized by the Marquis M. N. Degli Abbi, winter sports director at Lake Placid. It is intended to organize festive and lively day pack horse trips through the Canadian Rockies into the Far North. The northern limit of the trail will be the Columbia fields. The western limit will be the Yoho Valley and as far south as Mount Asinibolito.

British Farm Boys

Approximately Four Hundred Registered for Training in Alberta
Three companies of British farm boys are coming from various agricultural districts of England to Alberta for further training. Two parties of twenty are already at the schools of Vermilion and Olds, and another at Claresholm. With the addition of the Columbia field, the registration of British farm boys in Alberta will number approximately four hundred.

No matter how deep-rooted the corner may be, it must yield to Holloway's Kidney Remedy if used as directed.

Doctor: "I suppose, Mr. Johnson, that you have given me the medicine according to directions."
Mr. Johnson: "Well, doctor, I done mah best. You said give him one dose head pile three times a day with a glass, but I done give him a pile yesterday an' he ain't over yet."

Tommy: "Did you ever see an auto wreck, papa?"
His Father: "Yes, I saw a car hit another car, and then said into a ditch and turn turtle. Now don't ask me more questions."

Tommy: "But what did they do with the turtle?"

Many Crossing Highways

Not the least of expenses in connection with operation of vast railway systems is the damage continually done at level crossings by motorists who refuse to obey signals, or who give the meek acknowledgment that their brakes lack to work. That the railways are approaching a stage where they will have to have protection against tank attacks from automobile drivers running through crossing gates and into the side of moving trains, is the belief of J. P. Pratt, assistant counsel for the Central Region, Canadian National railways.

Manufacturing in B.C.

Growth of Manufacturing in the Province Has Been Phenomenal
British Columbia's growth as a manufacturing province is well illustrated by figures compiled by the Provincial Government. In 1924 only 418 plants were in operation, producing about \$20,000,000 worth of goods per year, whereas in 1924 no less than 1,000 plants were in operation with a total payroll of \$107,000,000, and produced goods to the gross value of \$285,000,000 the capital investment amounting to over \$100,000,000.

Anticipate Good Season For Trappers

According to advice from Fort Simpson, nearly 1,000 miles north of Edmonton, the indications are for a good fur year. Lynx and fox are numerous, while marten and beaver are well up to the average.

Bethel United Church

Dr. A. M. Scott of Calgary, the well known superintendent of schools of that city, and a prominent layman of the United Church will be the special speaker at both the morning and evening services Bethel church next Sunday, Dec. 26. Dr. Scott's prominence as a layman in the Conference of Alberta for several years, and his membership in the first general council of the United Church of Canada, will enable him to speak with great interest and profit on our services next Sunday. Come, and share these inspiring services with us.

The annual Christmas entertainment in connection with the Sunday school will be held in the church on Wednesday evening. A great program is being prepared for the occasion.

Sunday, December 27, will be observed as a special Christmas Sunday with us. Our choir are preparing some choice and appropriate music for the day.

The annual Watchnight service will be held on Old Year's eve, Thursday, December 31, at 11 p.m. Keep this date in mind, and join in this timely service.

Nazarene Church Announcements

Every Friday night is Young People's night. Mr. Chester Laing will be the speaker.

Prayer band and healing meeting Saturday, 8-30 p.m.

Sunday, 10:30 a.m. Subject, the 23rd Psalm.

3 p.m. meeting in Greenbank school.

7:30 p.m., a great evangelistic meeting. Subject, "The Good Samaritan." You will find a real welcome at the meeting where the real power of God is being felt. Simmer, the Blood still saves. Converted soul, the Holy Ghost still sanctifies. See Romans 15 and 16.

"If you're not free from inbred sin The Holy Ghost is not within."

Four Square Gospel

Plan to come and spend the day with us on Sunday, Dec. 26th. 11 a.m. Worship.

3 p.m. The valley of dry bones. 7:30 p.m. The unpardonable sin.

Most everybody knows about the boneyard in the Red Deer valley, where men are digging up the bones of dinosaurs, and other prehistoric animals, but have you heard of the boneyard in this district, and do you know that God's word talks about it? What is the unpardonable sin? Come and hear these inspiring messages. Are you sick and afflicted in body? Come and Jesus will heal you. Everybody welcome.

Tuesday, 8 p.m. Evangelistic service.

Wednesday, Dec. 26th, 7:30 p.m. Christmas tree and entertainment. All welcome.

Next Sunday, Dec. 27th, we will begin our Sunday school at 2:30 p.m. All Spirit filled teachers. If your children do not attend any Sunday school, send them along to learn about Jesus.
